PLANEX BUILD Ltd.
SAFETY AND HEALTH POLICY

The management of Planex Build Ltd is very conscious of its responsibility for developing a successful business with care for health and safety of people.

We adopt the following principles:

1. The care for the health and safety must be integrated into all present and future activity of the company.

2. Maintaining a high standard of health and safety, if possible exceeding specified in regulations requirements.

Observing these principles we seek:

- To identify hazards, assess risks and undertake measures for continuous improvement of the working conditions, to aimed achieving the ultimate goal - working without incidents, accidents and occupational diseases.
- To identify the aims and tasks related to Safety and Health early in the process of making business decisions and provide the necessary financial resources for their realization.
- To develop, inculcate and manifacture products that have the least possible negative impact on human health and use modern technology and equipment, allowing the creation of safe work places.
- To inform, instruct, train, monitor and exercise control on all employees to ensure their safety.
- To review periodically the Safety and Health policy and make it available to all interested parties.

This policy is notified to all employees of the company. Everybody working in/or for the company, within the limits of their professional competence, are required to carry out their responsibilities for Safety and Health and inform the relevant management of any discrepancy found.
